Software Engineer with 7+ years building and maintaining production systems across mobile, web, payments, and operational platforms in LATAM and the United States. Main programmer for publicly distributed Android and iOS applications (10,000+ Android downloads) with multi-year production maintenance. Experienced in integrating payment gateways, ERP systems, and role-based workflows in real-world environments. Currently seeking a software engineering role where I can contribute from day one.

TECHNICAL SKILLS

Languages: Kotlin, Java, JavaScript, TypeScript, Dart, SQL

Frontend: Android (Kotlin/Java), Flutter, React / Next.js, HTML, CSS, Tailwind

Backend & APIs: REST APIs, Firebase (Auth, Firestore), SQL Server, MySQL

Mobile Distribution: Google Play Console, App Store Connect

Tools: Git, CI/CD, Supabase, Agile

PROFESSIONAL EXPERIENCE

Full Stack Developer

Díaz Brothers Company LLC — Florida, USA

Jul 2024 – Sep 2025

- Designed and implemented a real-time operational dashboard for business visibility across the organization.
- Built an internal web and mobile system for field team management including task tracking, materials, and vehicle status.
- Developed a service order management platform with pricing logic, memberships, PDF generation, and automated email workflows.
- Reduced manual coordination between field teams and administration through structured workflow tools.
- Worked directly with company ownership to translate business needs into technical solutions.

Mobile & E-Commerce Systems Engineer

DIGICORP LTDA — Bolivia / Peru / Chile

Dec 2019 – Jun 2024

- Led development and publication of public Android and iOS applications via Google Play and App Store.
- Achieved 10,000+ Android downloads serving approximately 3,000 daily users in Bolivia.
- Maintained production systems across multiple release cycles (2020–2025) with Android 5.0+ compatibility.
- Designed and built the e-commerce web platform from scratch using Vanilla JavaScript in approximately 1 month.
- Integrated payment gateways and ERP systems; built custom APIs from undocumented databases.
- Implemented order and reporting modules improving internal process efficiency by up to 75%.
- Managed Play Console releases and collaborated with executive leadership and cross-functional teams.

Co-Founder & Technical Lead — Payments Platform

V@COMM — Bolivia

2018 – 2020

- Built "Octopus" online payment system with Android apps, printer integration, and Flutter digital wallet with OTP verification.
- Launched payment platform in two credit cooperatives processing about 1,000 daily service-collection operations.
- Enabled telecom collections and credit recharge through third-party API integrations, Firebase, and SMS workflows.
- Automated commission calculations and daily settlement reporting for cooperative teams.
- Owned backend, API design, and mobile development end-to-end.

Full-Stack Systems Developer

Iglesia Tiempo de Cambio — Bolivia

Jun 2016 – Dec 2019

- Built membership registration and reporting systems used daily by 100+ active users.
- Developed geospatial branch coverage tool using Google Maps and geofencing.
- Created role-based websites and internal dashboards used for recurring live events.
- Provided production support during high-traffic operational windows.

Junior Android Developer

TISMART (DATEC Division) — Bolivia

Jan 2015 – May 2016

- Integrated REST APIs for billing and inspection tracking (CRE electric cooperative).
- Implemented UI updates for financial applications (BancoSol, Banco Bisa).
- Contributed to Agile development cycles and production maintenance.

IT Support / Data Center Operations

DATEC LATAM — Bolivia

Aug 2014 – Dec 2014

- Supported early-stage D-Cloud data center monitoring systems.
- Maintained secure infrastructure workflows and operational protocols.

EDUCATION

Bachelor's in Systems Engineering — Universidad Católica Boliviana, 2012 – 2017
