CARLOS ARANCIBIA

Senior Product Engineer

Naples, FL • carloseav15@gmail.com • carlos-arancibia.com • linkedin.com/in/carancibiav • github.com/carloseav15

PROFESSIONAL SUMMARY

Pragmatic Senior Product Engineer with 8+ years of experience designing, shipping, and maintaining production-grade web and mobile applications across the U.S. and Latin America. Evolved from data center infrastructure operations to mobile development and full-stack engineering, building a strong foundation in transactional payment systems, real-time dashboards, and end-to-end product delivery. Proven record of translating complex business processes into clean, scalable software. AI-native workflow: I ship with coding agents while owning architecture, review, and quality. Currently based in the U.S. (EAD holder, no sponsorship required) and seeking a product engineering role to contribute to high-impact teams.

TECHNICAL SKILLS

Languages:	Kotlin, Java, Objective-C, JavaScript, TypeScript, Dart, SQL, PHP
Frontend & Mobile:	Android (Kotlin/Java), iOS (Objective-C), Flutter, React / Next.js 15/16, Tailwind CSS v4, HTML, CSS, WordPress
Backend & APIs:	REST APIs, Node.js, Firebase (Auth, Firestore), Supabase (Postgres, Edge Functions), SQL Server, MySQL
Mobile Distribution:	Google Play Console, App Store Connect
Tools & Quality:	Git, CI/CD (GitHub Actions), Biome, Vitest, Playwright, Agile

WORK EXPERIENCE

Creator (Public Side Project) | Playfit — Latest Project • Remote

- Public side project built to demonstrate AI-assisted product engineering end to end.
- Architected a Next.js 16 (App Router) and React 19 monorepo application separating apps/web and @playfit/core.
- Open-sourced the codebase (github.com/carloseav15/playfit) and structured the roadmap for native Android, iOS, and Flutter variants.
- Engineered a real-time recommendation scoring engine for user game affinity and friction risk.
- Implemented Supabase Row-Level Security (RLS) and PL/pgSQL database-level functions, eliminating exposed keys.

Creator (Personal Project) | Unified-World Web RPG (Private Repository) — Sep 2026 - Present • Remote

- Porting the decompiled C source of a classic Game Boy Advance RPG to TypeScript, running in the browser on a 240×160 Canvas.
- Goal: the original series split its world across separate games, one region each; this project joins three regions into one continuous world with quality-of-life improvements.
- Emulates the handheld's graphics hardware (PPU, VRAM, OAM, palettes, DMA, VBlank) and translates the decomp nearly line by line.
- Built with AI coding agents under explicit project rules, batch-based porting, and generated progress inventories. Code available on request.

Inventory Control Specialist | Nordstrom Rack — Sep 2025 - Present • Naples, FL

- Promoted from Logistics Processor to Inventory Control Specialist within one year; non-technical role held while pursuing my next software engineering position.
- Support inventory accuracy through data analysis and day-to-day coordination across store teams.
- Recognized as Employee of the Month (Logistics Processor) and with the Asset Protection Rackstar award (Sep 2026).

Software Engineer | Diaz Brothers Company LLC — Jul 2024 - Sep 2025 • Bonita Springs & Naples, FL

- Designed and built a real-time operational dashboard for logistical transparency and technician/vehicle dispatch tracking.
- Created an internal service order logistics system with custom pricing logic, PDF invoice generation, and automated workflows.
- Eliminated manual phone coordination between field teams and administration by establishing real-time scheduling tracking.
- Redesigned the company website to improve engagement and showcase services.

Mobile & E-Commerce Systems Engineer | DIGICORP LTDA — Dec 2019 - Jun 2024 • Bolivia / Peru / Chile

- Main programmer for public Android & iOS applications (DigiApp), achieving 10,000+ public downloads and maintaining stability for 4+ years.
- Designed and built the B2B e-commerce web platform from scratch in Vanilla JavaScript, HTML, CSS, and SQL Server.
- Built backend REST APIs from scratch in PHP; engineered reverse-engineering flows on the legacy database due to a lack of documentation.
- Developed Flutter mobile prototypes in fast-paced 1-month loops, heavily contributing to UI/UX design.
- Integrated payment gateways and ERP systems into the customer order request process, cutting order time by 75% for clients and customer service.
- Managed DigitalOcean (Linux) and Windows Server instances, and integrated Firebase services.
- Supported a platform serving 3,000+ daily active B2B clients in Bolivia.

Co-Founder & Technical Advisor (Part-Time) | V@COMM — Jan 2017 - Jun 2024 • Bolivia

- Developed 'Octopus' online payment and collection architecture, Android printing integration, and settlement logic.
- Designed Android point-of-sale flows with thermal printer integrations and automated settlement logic.
- Built a Flutter digital wallet app with OTP verification, SMS gateways, and Firebase integrations.
- Automated commission and daily settlement calculations, eliminating manual reconciliation.

Full-Stack Systems Developer | Tiempo de Cambio Operations Platform — Jun 2016 - Dec 2019 • Bolivia

- Built daily registration and reporting systems used by 100+ active users.
- Implemented geospatial branch coverage tools with geofencing.
- Delivered role-based websites and internal dashboards.

Junior Android Developer | TISMART (DATEC Division) — Jan 2015 - May 2016 • Bolivia

- Integrated REST APIs for billing and inspection tracking (CRE electric cooperative).
- Implemented UI updates for banking mobile apps (BancoSol, Banco BISA) and the official Datec mobile app.
- Contributed to Agile development cycles and production maintenance.

IT Support / Data Center Operations | DATEC LATAM — Aug 2014 - Dec 2014 • Bolivia

- Supported early-stage D-Cloud monitoring systems.
- Maintained secure infrastructure workflows, monitoring tools, and followed operational protocols.
- Built a foundational discipline in reliability, incident management, and production operations.

EDUCATION

Bachelor's in Systems Engineering — Universidad Católica Boliviana — 2012 – 2017
